

Aqua Aero Coatings

Reference Projects

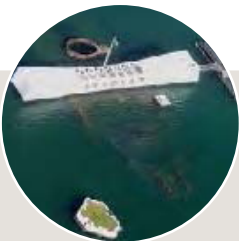

Aqua Aero coatings have been applied in many projects over the world. The coated coil and components have been exposed to various extremely harsh environments for years.

Following projects are presenting the resistance of Aqua Aero coatings at all environmental conditions.

HAWAII

York Rooftop Units for Pearl Harbour. Coils coated with Aqua Aero KL10K coating. Panels and components coated with Multi Coat Siloxane. Warranty 10 years against corrosion. **Environment, heavy marine exposure, high level of UV radiation.**

SAUDI ARABIA

Coated Zamil airconditioner chiller coils installed at a desalination plant in Al Khobar, Saudi Arabia, have been exposed to **extreme marine industrial conditions**, without any indication of corrosion after five years of installation.

**100%

quality**

Aqua Aero Coatings

Reference Projects

SAUDI ARABIA

Behr radiator coolers for diesel engines are feeding the waste water treatment plant in Medina, Saudi Arabia. High levels of H₂S and NH₃ create **extreme corrosive conditions with high abrasive exposure**. Aqua Aero coatings have proven to be resistant.

SOUTH AFRICA

Carrier chiller Aqua Aero coated MCHX coils and Multi Coat Siloxane Panels and components were coated at a shopping mall in Cape Town. **High levels of UV radiation and marine exposure** for three years without deterioration.

ITALY

Our applicator is coating air coolers for industrial applications for many years. Due to the extreme **importance of cooling reliability of data centers**, we have protected many coils for Schneider Electric.

SEYCHELLES

A Trane chiller exposed to **high concentration salty winds**, resulting in crystal forming between the chiller fins. AA coil coatings offers a ten-year protection against corrosion. Seychelles are located in the Indian Ocean with **high UV exposure and high temperatures**.

Aqua Aero Coatings

Reference Projects

TEXAS

Shield Air is a renowned AC modification company in Houston, Texas. Aqua Aero KL 10 K coating for coils and enclosures are applied to all their units that go **off shore** for lasting corrosion protection.

FLORIDA

Addison is building units for target market and offering a **10 000 hours saltspray test** protection for both the coils as well as the complete units. Addison and Aqua Aero are partners since 2001.

NETHERLANDS

Campina, a dairy processing company in the Netherlands is applying Aqua Aero coatings to all their new and replacement coils, due to the **environmental friendly application and non-hazardous qualifications**.
